

PROCEDURE FOR E-HEARING OF APPLICATIONS BY CESTAT

(www.cestatnew.gov.in)

I. Introduction

The lock down declared by the Government due to COVID 19 pandemic has affected the regular hearing of appeals by all the Benches of the Tribunal since 16 March 2020. Even if the situation improves, the risk involved in conducting regular Courts is high. Therefore, a system of hearing of cases through video conferencing has emerged as an alternative for regular Court sitting in some of the Courts and Tribunals in the country. The Hon'ble Supreme Court, in *Suo Moto Writ (Civil) No. 5 of 2020*, has permitted Courts across the country to conduct legal proceedings by leveraging technology, thereby furthering the objective of Article 39A of the Constitution. The Customs, Excise and Service Tax Appellate Tribunal also endeavors to dispose cases of urgent applications through e hearing in all its Benches by utilizing the technology to the best extent possible.

II. Video Conferencing Platform

Various video conferencing platforms are available for use. For conducting e hearing of urgent applications on video conferencing platform, *Jitsi meet* appears to be more adaptable having regard to the functional environment of CESTAT. *Jitsi meet* is an open source software and is available for download at <https://play.google.com/store/apps/details?id=org.jitsi.meet> The registration process is fairly simple and requires only an e-mail address.

III. Technical and Infrastructural Requirement

To have a proper hearing on the video conferencing platform it is necessary that the exchange of information is seamless and without interruption. The minimum requirements are the following.

- 1. Desktop/Laptop:** The system should have a proper processor and RAM. The system should be equipped with a webcam which will support HD video. It should also have an inbuilt **mike and speakers**. However, external headphones with mike may also be used for hearing. **i pads** of proper configuration may also be used. Mobile phones should be avoided as the hearing can be interrupted by incoming calls and screen size constraints.
- 2. Internet Connection:** The internet connection should be of good speed and it is advisable that no other device is connected to the *wifi* router during the hearing.
- 3. Telephone/Mobile phone:** A telephone/mobile phone maybe kept as an alternative mode for uninterrupted hearing in case there is an unforeseen break in video streaming.

IV. Procedure for listing

1. Any party desirous of getting an application of urgent nature heard by video conferencing may send a request, as prescribed in Annexure II, to the Registry by e mail. The party making the request must also indicate the approximate time that it would take to make submissions so that hearing is conducted in a time bound manner.

2.

The parties are required to enter appearance by accepting the invitation link as intimated and they must not share the password with any other person.

10. In the event a party that has made a request for e-hearing does not wish to be heard through video conferencing, this fact shall be stated in the request form. It shall, however, be open to the other party to indicate that they would like to be heard in person through video conferencing or not. The party shall, however, follow the procedure indicated in paragraphs 4 and 5 above. The Application will be decided on the basis of the documents supplied by the parties.

11. The Registry shall maintain an e hearing of Application Register containing the details of the appeal and application, date and time of hearing, the names of Counsel and the Authorized representative, the Coram and the nature of the order passed.
